

The chart displays the daily count of new COVID-19 cases in the Netherlands. The data shows a sharp increase in early February, peaking at over 100 cases. Following this peak, the number of cases fluctuates between approximately 95 and 98 for several weeks. A general downward trend is visible starting in late February, with a notable dip in late March, reaching a low point around 85 cases before a slight recovery and then another dip at the end of the period shown.
