

The line graph illustrates the daily death toll from COVID-19 in the United States over a 13-month period. The y-axis represents the number of deaths, ranging from 0 to 10,000 in increments of 2,000. The x-axis represents time, with labels for March 2020, May 2020, July 2020, September 2020, November 2020, and January 2021. The data shows a high initial death rate in March 2020, peaking at nearly 10,000 deaths per day, followed by a period of fluctuation with a notable peak in mid-2020. The overall trend shows a significant reduction in deaths by late 2020, with a final sharp decline in early 2021.

The line graph displays the daily death toll from COVID-19 in the United States. The x-axis represents time from March 2020 to March 2021, with major ticks every two months. The y-axis represents the number of deaths, ranging from 0 to 10,000. The data shows a sharp initial rise in deaths starting in May 2020, peaking at approximately 10,000 in late May. This is followed by a period of relative stability with minor fluctuations until a second, even higher peak occurs in late August, reaching nearly 12,000 deaths. After this peak, there is a significant and sustained decline in the death toll, with several smaller peaks and troughs as the trend continues to fall. By March 2021, the death toll has decreased to around 4,000, showing a clear downward trend from the initial surge.

The chart displays the population aged 15 and over in 2019, categorized by sex and age group. The population is largest in the 15-19 age group and smallest in the 75+ age group. The population is generally larger for males than for females across most age groups, except for the 15-19 age group where females are slightly more numerous.

| Age Group | Male | Female |
|-----------|------|--------|
| 15-19 | 10.5 | 10.8 |
| 20-24 | 10.2 | 10.5 |
| 25-29 | 10.0 | 10.3 |
| 30-34 | 9.8 | 10.1 |
| 35-39 | 9.6 | 9.9 |
| 40-44 | 9.4 | 9.7 |
| 45-49 | 9.2 | 9.5 |
| 50-54 | 9.0 | 9.3 |
| 55-59 | 8.8 | 9.1 |
| 60-64 | 8.6 | 8.9 |
| 65-69 | 8.4 | 8.7 |
| 70-74 | 8.2 | 8.5 |
| 75+ | 8.0 | 8.3 |

A bar chart showing the number of nodes in the network for each iteration. The x-axis represents the iteration number (0 to 37), and the y-axis represents the number of nodes (0.0 to 1.0). The number of nodes remains consistently high, near 1.0, across all iterations, with a slight downward trend indicated by a red line.

| Iteration | Number of Nodes |
|-----------|-----------------|
| 0 | 0.98 |
| 1 | 0.97 |
| 2 | 0.96 |
| 3 | 0.95 |
| 4 | 0.94 |
| 5 | 0.93 |
| 6 | 0.92 |
| 7 | 0.91 |
